Sirs,

The above Bill has been brought to my attention as having within it clause/s which would, among other things, make it illegal to offend someone else in or at work on the ground of their religious (or political) beliefs. If this is so, then it would amount a repression of free speech and take us further down the track of godless socialism, a pathway that has already spelt disaster for so many people in other parts of the world.

Presently I am in the course of writing a Series of Articles which highlight the dangerous consequences of departing from the standard biblical teachings which the western world have cherished and enjoyed for so long! Indeed, we have already seen sufficient departures already from this standard and seen something of the bad consequences which have arisen; so please let us not take it any further!

Attached is an Article which I have just written showing how devastating can be the consequences of listening to those who would seek to promote godless socialism, with a lot more detail being spelt out in the Book on which the article is based.

AND how did the communists get away with? They simply applied the principle of ***"slice it thin, but slice it often, and people won't notice until it is too late"!***

Free speech and freedom of religion are both fundamental doctrines of a free society. So please do not let the intellectuals tamper with it – it will be too late afterwards – for going back is virtually an impossibility once the legislation is in place!
