Is there anything *not* caused by wind farms?

A list of diseases, symptoms and aberrant behaviours in humans and animals said to be caused by wind turbines.

Prof Simon Chapman, School of Public Health
Teresa Simonetti, Sydney Medical School,
University of Sydney

Note to readers. We hope to expand this ever-growing list of claims made about health problems in humans and animals that wind farm opponents attribute to exposure to wind turbines. If you are aware of any extra claims, please send them with hyperlinks to simon.chapman@sydney.edu.au

200 diseases and symptoms, and the list still growing. Last updated Nov 2, 2012
Latest additions are marked in green

52. Diarrhoea
http://www.healthywindwisconsin.com/Ontario%20Health%20Survey%20Abstract%20Results%20and%20Responses.pdf

53. Disrupted relationships
http://www.healthywindwisconsin.com/Ontario%20Health%20Survey%20Abstract%20Results%20and%20Responses.pdf

54. Dizziness http://www.wind-watch.org/news/2011/09/21/wind-farm-ruined-our-health-family-suit-claims-vertigo-nausea-and-sleep-loss/

55. Dogs: ignoring owners, climbing between couch pillows, wall-staring "When they did venture outside, they wouldn't listen when you called; they just kept wandering on and on. The other weird thing we noticed is that one of his dogs would try to squeeze itself between the lounge cushions to sleep, and the other dog would climb under the bed in the corner. Or they would sit for hours, staring at the wall."
http://www.windturbinesyndrome.com/2012/most-eggs-had-no-yolk-and-the-shells-were-like-jelly-australia/ "once-active dogs spent their days staring blankly at the wall."

http://www.theaustralian.com.au/national-affairs/opinion/wind-farm-scam-a-huge-cover-up/story-e6frgd0x-1226345185075

56. Dogs refusing to work: "Recently, Hamilton Vetcare has had to examine dogs, normally active and keen to work, that have become sullen and reluctant to leave their kennel after nearby windfarms became active. Farmers report working dogs once highly motivated and responsive, becoming disinterested and refusing to work, especially when winds are coming from the direction of the windfarm."
http://www.hamiltonvetcare.com.au/HamiltonVetcareBlog/tabid/25531/EntryId/280/Default.aspx

57. Dogs: loss of muscle tone, paws over ears, gnawing on pebbles then death. "Also our pet dog went from a vibrant healthy dog to dying in a short amount of time she started losing muscle tone lying in front of heater with paws over ears and gnawing on pebbles" https://www.illwind.org/reports/view/245

58. Drinking problems (alcohol) http://www.wind-watch.org/news/2012/05/25/residents-tell-how-turbines-have-impaired-their-health/

59. Dry retching http://www.dgstandard.co.uk/dumfries-news/local-news-dumfries/local-news-dumfriesshire/2012/06/29/monks-selling-retreat-at-ae-forest-51311-31282392/

60. Earthworms leave the soil near wind turbines "seagulls no longer follow the plough in areas near wind turbines. It has been suggested that the seagulls have learned that the worms have all been driven away and that in that area the farmer's plough will not bring breakfast to the surface. They must go elsewhere for their food." Suggestion is this effect might be as wide as 18km radius from a turbine ("So, what do we know about the seismic noise of wind turbines? … The seismic vibrations remained strong beyond 10 kilometres and were still detectable at 18 kilometres." http://www.wind-watch.org/documents/wind-power-and-ecology/

61. Ear pain
