

Every time I take my children to a park I am disgusted by the amount of litter which consists mainly of empty drink containers. A 10 cent deposit would reduce the amount of litter in two ways:

Firstly the litterers would be more likely and secondly litterers would be subsidising individuals or charities who wanted to clean up the litter.

The worst possible outcome could be a small reduction in the consumption of soft drinks and alcohol. That's great. Less obesity, diabetes and drunken behaviour problems. Maybe we should make it a \$10 deposit.

Surely passing this bill will be the easiest decision for any government.

Thankyou
