

The Richard Hillman Foundation wish to highlight the significance of Family Separation on Men's health. It is much bigger both in numbers and intensity than a relationship breakdown of losing a job. While both of these are sometimes factors in Family Separation the loss of ones family, particularly the children becomes unbearable for many.

What part does STRESS play in human health.??

Could you confirm or deny that 50% of male sickness is due to Family Separation stress?

What percentage of Men's health could be attributed to Family Separation STRESS ?

Apparently more than 50% of males on unemployment benefits have failed to hold even find jobs due to their inability to cope with work due to Family Separation.

The present Ideology is quick to blame male suicide onto predisposition and genetics. If this is the case why is it that men rarely suicide at war, with all the atrocities, but they do at home?

Family Separation Stress = Losing family, the relationships with their children, the home and furnishings, the car, the bank account +++ Trying to reestablish yourself on a vastly reduced wage, BUT at the level required to be able to house his children once a fortnight.

Work accidents and inattention: what percentage have family separation in the mix of causal factors.

Illnesses, especially chronic, seem to have a common formula:

Gene The Trigger Illness Feeding of chronic disease.

The Richard Hillman Foundation believes that family law is ' The Trigger ' in many instances.

Worse the figures are being deliberately hidden. Forexample in male suicide it is considered that it is being under-reported by 60%. No wonder suicide rates are on the decline.

Will this inquiry hand down its decision based on FIXING the problems OR ' Harm Minimisation'? ie. Will lot's of support agencies be recommended to help these poor souls, rather than recommending a fairer system so the problem in large part is extinguished?

MYTH: All men are bastards and don't care about family.

Most men do care about their families and their relationships with them. This is most evident in the talk and behaviour of the separated men who are often so distaught and gutted at losing the day to day contact with their children and family that suicide becomes an option.

Unfortunately, for some, who do not have sufficient support to fight the depression of loss, that suicide becomes the only option.

OR THIS:

<http://www.googlesyndicatedsearch.com/u/AustralianBureauOfStatistics?q=SUICIDE+1921+-+2005++%2B++GRAPH&sa=GO&domains=abs.gov.au&site=search=abs.gov.au>

TRENDS IN SUICIDE, 1921-1998(a)

NB. 1975 Family Law Act > > > > ' ^ '

4. Modern day suicide in men has a peak in ages 20-45
5. Most at risk group is the separated male.
6. In 1996 the rate was 27 per 100,000.
7. In 1998 the rate was 37 per 100,000...Approx 40% increase.
8. Separated males are 6 times more likely to commit suicide than married men.
9. The suicide rate of separated men (under 29) is 150 per 100,000.
10. There are approx. 40 male suicides per week in Aust.
11. Up to 30 Of these could be separated males [Marital Breakdown, Parenthood, and Suicide by C.CANTOR and P.J.SLATER 1995.] & [Baume, Cantor, McTaggart 1998.][70%]
12. Up to 20 ie. 2/3 ' rds of these men are paying through "The Child Support Agency" [There is no real

Evidence of this, rather estimated figures that the Child Support Agency will
neither confirm or deny.]

MURDER: There is a growing argument by some that the incremental steps with seemingly increasing intensity that are placed on fathers who dare to fight to see their children, and who eventually succumb to suicide could be investigated as murder with the perpetrators of this ongoing abuse, from courts and Child Support Agency, being charged with murder as accessories to the fact.

QUESTION TO CHILD SUPPORT AGENCY:

If there are approx.33000 clients who exit the scheme each year, how many do so

In a box?

13. Per head of jail population [i.e.. Inmates in jail] there are as many white male
Suicides in custody as black. We are aware that aborigines, because of the
Cultural breakdown, have a higher percentage of their population in jail and suicide.

But just as many white men suicide in jail. WHY ??

14. There are 1.5 times more deaths by suicide in Australia than by road deaths [2680
Suicides {approx. 2150-2000 male} compared to 1710 road accidents].

Where would we put the ' speeding cameras ' for suicide ??

15. Suicide or Accident ?:

A) Single vehicle car accidents ... no skid marks only big tree on the road ... ?

B) Drug overdose.

16. Cantor & Baume, at the suicide research and prevention at Griffith University
QLD found

that in a study of 4000 suicides, at least 70% were associated with relationship
breakups (attorney generals departments 2000 fact sheet – forum on men and
Family relationships Canberra)

<http://www.ag.gov.au/frb/mensforum/people/25.html>

17. Are some causes of death given as accidental overdose rather than suicide because of the stigma attached to suicide ?

WHY NOW

THE key people are beginning to see that it is a major issue and it will not go away.

.....
.....

Suicide Prevention Association.

Dear Mark

I am pleased to inform you that after a long delay, we are now going to imminently progress a meeting with DoHA, Family Law Courts, Child Support Agency & AG about matters relating to suicide prevention.

We have ideas of what we would want to discuss at such a meeting, but we thought it would be helpful at this point if you could also clarify for us your particular aims in pursuing this. Hopefully we can itemise our shared concerns for the agenda.

Once I feel we can clearly articulate that to the invitee list for the meeting, Ryan will send the invitation out and arrange the meeting.

Hope you are well, and best wishes

From: Traks

Dear

thankyou for your request for questions for your meeting with the relevant authorities as described below. Below are the questions that people concerned with fathers and their depression at losing a loving and meaningful contact with their children often articulate.

I would be happy to discuss these with you at any time.

Thankyou for raising this important area of suicide with the authorities as nearly everyone I speak to who has been down this path has not only considered suicide, but chosen how they would do it.

Our questions are :

1. How many suicides each year have a link, to Family breakdown / separation or divorce ?

2. How many questionable deaths, as exposed by Eric Tresize and team on the Central Coast, can be linked to family separation and suicide.
3. How many of these deaths (people) were described anti-depressants after separation / or as a result of marriage problems which the couple were trying to work through ?
4. How many payers of Child Support each year cease due to deaths, and how many of these are suicide OR questionable deaths ?
5. Could the sudden turn upward on the suicide graph for men in the mid '70's be attributed to any other factor than suicide ?
6. How many work accidents result in death because of inattention, and perhaps could be linked to suicide, and is there a link to family separation ?
7. Police tell us that many single road accident victims die in questionable circumstances - eg. no brake/skid marks, or only big tree along road etc... and do any of these have a link to family separation ?
8. Emergency Hospital staff tell us that there are many suspicious clients and in particular : - females 15 - 20 and males 25 - 30 who it seems have tried to commit suicide. How many of these are experiencing family separation problems ?
9. What % of youth suicide is linked to Family Separation ?
10. What % of old age suicide can be linked to family separation and resultant loneliness without family to help care for them ?

Bellow is the extract from the Hansard you asked for from the Federal Senate August 18 2005 page 171

Stephen

Child Support Payments

(Question No. 978)

Senator Kirk asked the Minister representing the Minister for Human Services, upon notice,

On 23 June 2005:

(1) How many resident families ceased receiving payments through the Child Support Agency because

The non-resident father has died.

(2) How many resident families ceased receiving payments through the Child Support Agency because

The non-resident father has committed suicide.

Senator Patterson—The Minister for Human Services has provided the following answer

To the Honourable senator's question:

(1) In 2002-2003 there were a total of 1 527 male payers recorded on the child support computer system

As having died. This is the latest data available.

(2) CSA does not collect data on client suicides or other reasons for death.

How many of these 1527 male / fathers paying child support would you expect to DIE of OLD AGE ??
