

Dear Sir/Madam

It is my opinion that a Beverage Container Deposit and Recovery Scheme is the best way to deal with this type of waste. It will generate income to enable the effective recycling of such waste, drastically reduce the amount which ends up in landfill, reduce litter, create new industry, expand existing industries and thus provide increased employment opportunities. This type of legislation should also be expanded into electronic waste recycling and reuse, (eg. computers, televisions, monitors, etc).

Anne Goddard
