

To whom it may concern,

As a consumer I wish to support the Food Standards Amendment Truth in Labeling Bill. I would like to be sure in the knowledge that my supermarket purchases are not contributing to the decline of Orang-utans in the wild.

With Palm Oil manufacturers moving into Papua New Guinea it is time **we** slowed the expansion and saved one of the last wild frontiers from human destruction. As 10% of the world's biodiversity lives on 1% of the world's land mass (New Guinea) I want to save those species yet to be discovered from Palm oil mono-culture and possible extinction.

Kind Regards

Yvette
