Subject: amendments to Renewable Energy Act
Date: Wednesday, 31 October 2012 9:22:05 PM

I support these proposed amendments to the Renewable Energy Act, because we have been in close association with the problems encountered by a friend who lives close to the Waterloo windfarm and they have had unresolved problems with excessive noise and vibration since the windfarm has been active. We can hear the windfarm from where we live and will be in line with the proposed Stony Gap windfarm and do not want our lifestyle and health affected in the same way as residents of the nearby windfarm.

Chris and Philip Ruediger
